FOR IMMEDIATE RELEASE
June 24, 2020

JEM TECHNICAL IS THE #1 HYDRAFORCE DISTRIBUTOR FOR 2019

JEM is not only the largest HydraForce cartridge valve seller in the US and Canada, but also a top custom valve block manufacturer in North America.

Orono, MN - JEM Technical, Inc. is proud to announce that HydraForce, Inc. has named the company as its top distributor and authorized seller of cartridge valves, custom manifold blocks, and electronic controls in 2019.

JEM has been an authorized sales and service center for HydraForce since 1985, and stocks thousands of authentic HydraForce components for its mobile equipment manufacturer customers. Last year, JEM Technical sold more than 120,000 valve assemblies featuring HydraForce valve products.

“We are delighted to reach this significant milestone with HydraForce last year,” said Andrea Tysdal, president of JEM Technical. “HydraForce continues to be a preferred supplier for us due to their wide range of product, commitment to quality, and industry leading 5-year warranty.”

JEM Technical is authorized to sell HydraForce products in Minnesota, Wisconsin, North Dakota, South Dakota, and Florida in the USA, and Manitoba, Saskatchewan, and Alberta provinces in Canada. Many of JEM’s sales, engineering, and technical staff have attended on-site factory training sessions and courses to maintain their hydraulic and electronic control expertise and certifications.

As a manufacturer, JEM Technical offers a full array of custom valve manifold options available in various materials, sizes, and configurations available throughout the USA and Canada. They also offer full system integration services by engineering motion control strategies utilizing HydraForce electronic vehicle controls.

HydraForce, Inc., headquartered in Chicago, IL, offers the widest breadth of cartridge valves in the industry with over 600 standard valve models including directional valves, electro-proportional valves, flow control valves, G3 valves, multifunction valves, pressure control valves, solenoid valves. To complement the valve line, they offer a full range of electronic controllers, proportional valve drivers, remote access units, operator interfaces, and sensors.

About JEM Technical, Inc.

JEM Technical is a fluid power systems integrator for original equipment manufacturers and industrial applications. JEM designs and manufactures custom valve manifolds that include industry leading cartridge valves and electronics which are also available independently through authorized distribution territories in the United States and Canada.

The fluid power and motion control experts at JEM Technical have the knowledge and expertise to improve the technology of your equipment to achieve maximum system efficiency.
