JEM TECHNICAL APPOINTS NEW DIRECTOR OF SALES AND MARKETING

Andrew DeRung, industry veteran with two decades of hydraulic and electronic controls experience, promoted to new position

Orono, MN - JEM Technical, Inc. promotes Andrew DeRung, a twenty-year hydraulic and electronic controls veteran, to Director of Sales and Marketing for the company. He will focus on providing strategic direction and effectively managing and coordinating the sales objectives of the company, as well as growing U.S. sales, expanding customer base, finding new product lines, building on JEM's positive reputation, and supporting all departments within the organization.

DeRung joined the JEM team nearly a decade ago. In his previous role as Electronic Controls Manager, he contributed his vast technical expertise to development and growth of the JEM Controls Division within the company. Previously, he served as a Systems Engineer at Eaton's Hydraulics Division. During his tenure at Eaton, he was responsible for commercializing electro-hydraulic control solutions for the industrial equipment markets.

"Andrew has been a valuable employee in our organization for some time," said Andrea Tysdal, president of JEM Technical, Inc. "Given his history with us, as well as his product and industry knowledge of hydraulic and electronic controls, I am confident that Andrew will lead JEM Technical to the next level, bringing new services and solutions to our customers."

DeRung earned his Bachelor of Applied Science in Manufacturing Management at the University of Minnesota, Crookston, and also attended Alexandria Technical College where he earned his Associate of Applied Science degree in Manufacturing Engineering.

"JEM's expertise in controls technologies truly makes it an industry leader," said DeRung. "It's been exciting and enjoyable to work with the company over the last decade and I'm looking forward to continuing to contribute to the company's growth and bring the best product lines and service to our clients."

About JEM Technical, Inc.

JEM Technical is a fluid power systems integrator for original equipment manufacturers and industrial applications. JEM designs and manufactures custom valve manifolds that include industry leading cartridge valves and electronics which are also available independently through authorized distribution territories in the United States and Canada.

The fluid power and motion control experts at JEM Technical have the knowledge and expertise to improve the technology of your equipment to achieve maximum system efficiency.
